

My name is [REDACTED]

This is what i think makes competition difficult for our small businesses:

1. Ignorance (how many small business individuals have seen this article)
2. Lack of education (a lot more people venture into business without basic knowlwdge of how to fill a SARS form, income expenditure etc.)
3. The past. (There is still a wide gap in communication) between black and white (have and have not)
4. Greed (Small business are only invited by profit chasērs and the desperate and not for development.)
5. Reluctance. (our own small business are always reluctant to go from office to office wanting advice and knowledge/info, all they need is cash.

Thank you

[REDACTED] is a teacher who has a cc in wholesale and retail and thinks to venture into business one day.
