Advocacy Group
Uber & Taxify Drivers

TERMINOLOGY

- ❑ **UBER** – an app that originated in San Francisco but currently the head office is in Amsterdam
- ❑ **TAXIFY** – an app that originated in Estonia. The head office is in Europe.
 - ❑ **DRIVERS** – Drivers that physically drive the vehicles but do not own them
 - ❑ **PARTNERS** – Partners own the vehicles
 - ❑ **PARTNER/DRIVERS** - partners that own and drive their own vehicles.

NOTE:

Uber refers to all drivers and partners as driver/partners which is misleading as it does not distinguish the difference between drivers and owners.

It is also misleading as we are not partners as we have no say in anything that affects us.

We are not called employees but “independent contractors” however Uber dictates what cars we drive, how we behave, how we dress etc. They also “de-activate” drivers/partners should we fall short on their rating system. (which is another issue) or they have a reported issue with us OR if we speak out against them.

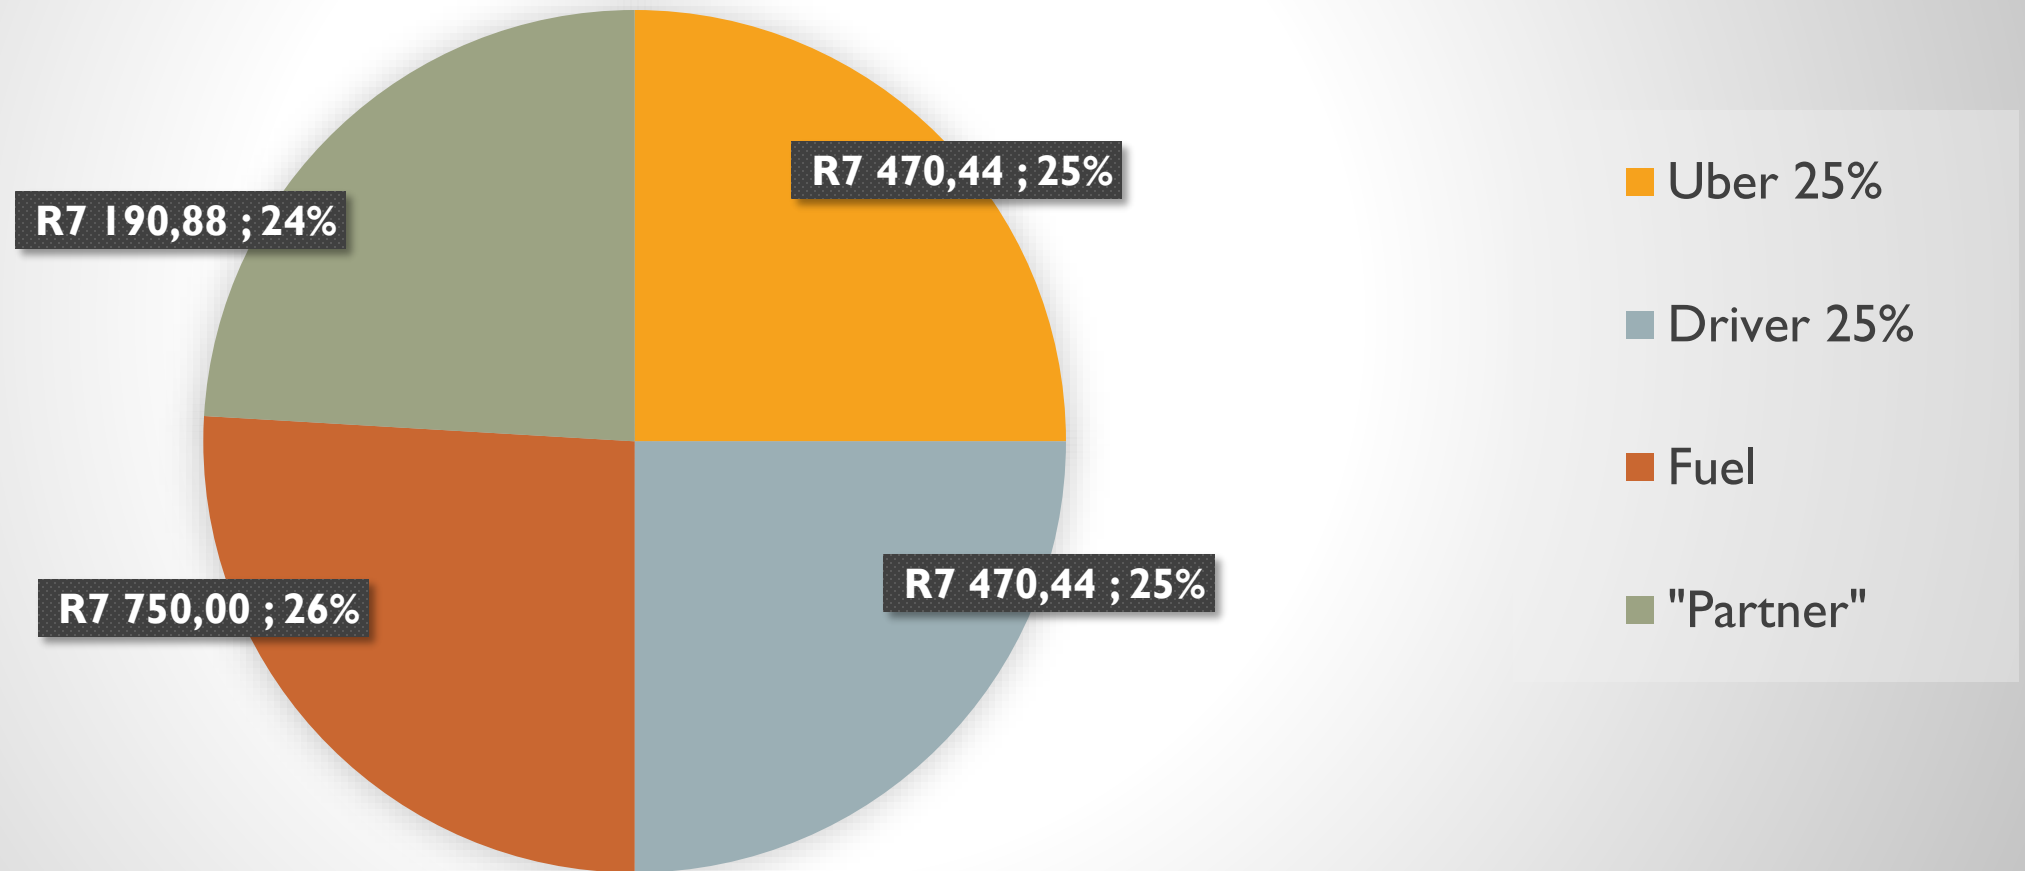

As independent contractors we

1. Have no Protection under labour law
2. Don't have the right to mobilize (in fact we have often been intimidated by Uber when we have attempted to mobilize. We have even had our photographs taken without our permission when we have held meetings.)
3. Any benefits of employees

RIDERS – customers who hail an Uber or Taxify vehicle through the app

**CAR A BASED ON UBER X R 5 000
INSTALMENTS R 1 600 INSURANCE**

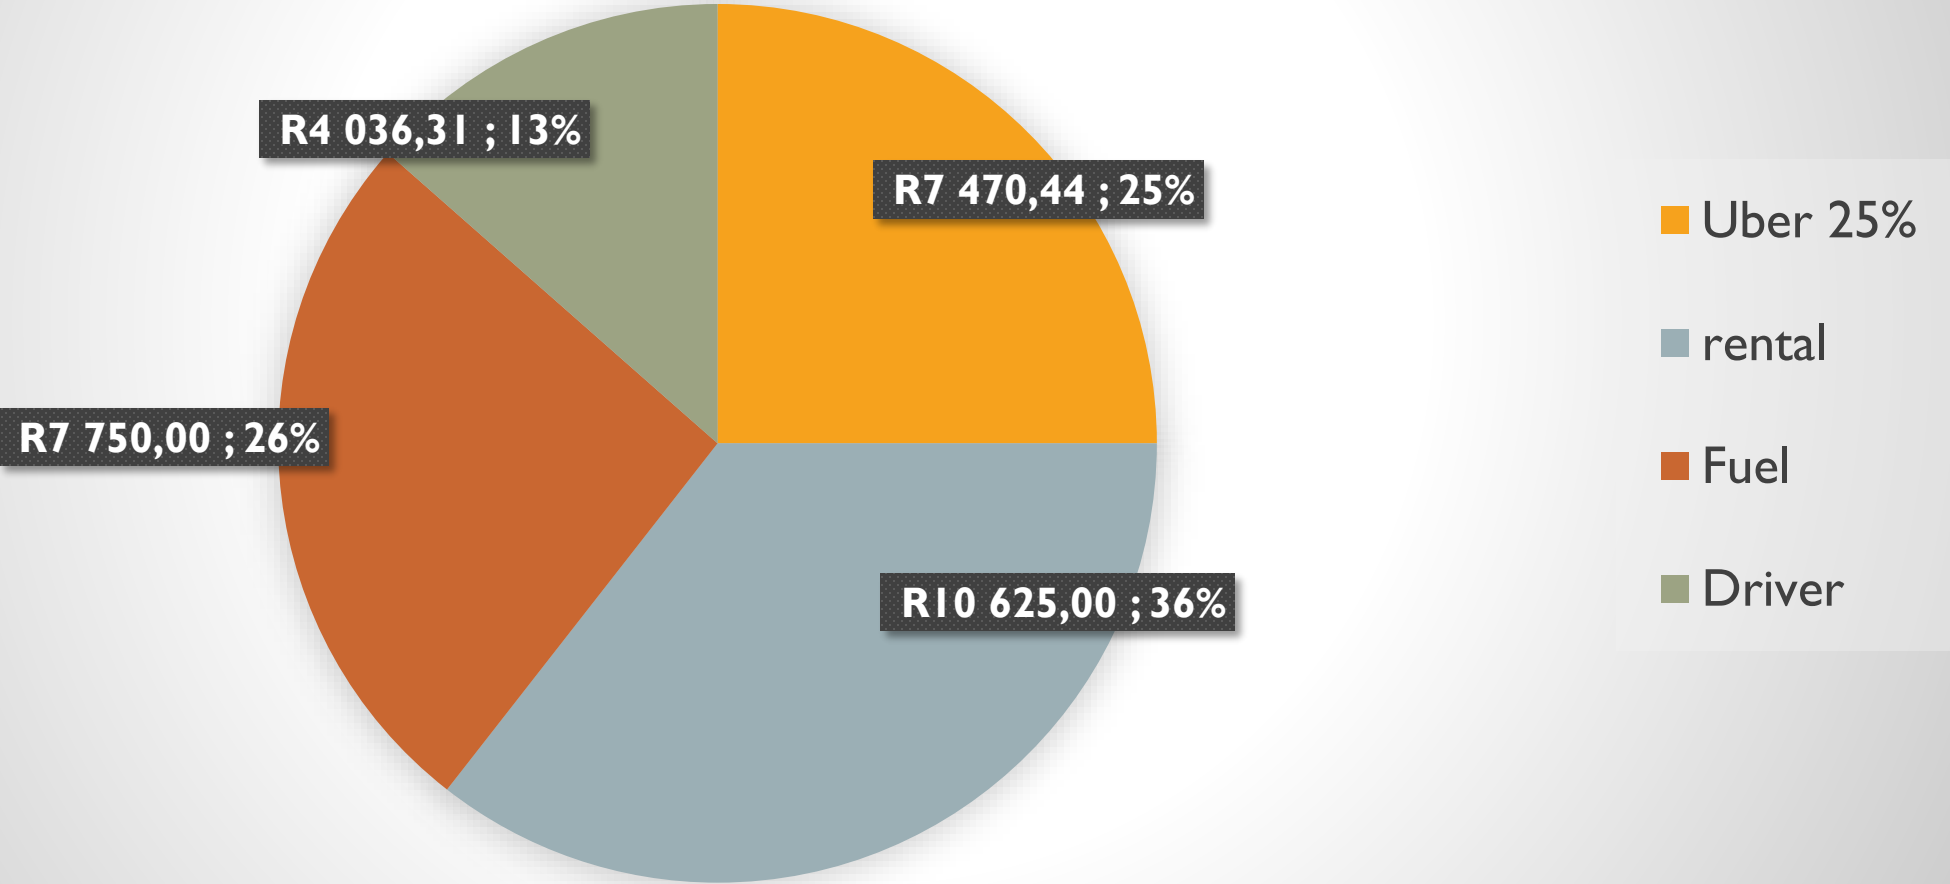

**Car A based on Uber X
Driver working on 25% before Uber
